

VITREA

When planning your home, you imagine how to use each space. Would not it be magic if you could set the mood in the living room or create a romantic feeling while you dine?

By adding all-in-one VMax by Vitrea controllers your dreams are at your fingertips.

VMax by Vitrea's unique technology allows you to create custom scenarios and schedule their activation according to the time of day or weather conditions.

You can program your garden and hallway lights every day from dawn to

dusk so you never have to walk into a dark house. Use the app to regulate your heating or cooling when you leave your office or turn off the lights you accidentally left on in order not to waste electricity. VMax by Vitrea takes your smart home even further with its integrated astronomical clock. This allows you to automate your home everyday. Imagine waking up in the morning, your shutters opening halfway up, the sunlight gently lighting your room, the air conditioning regulating the temperature and some musical notes for a perfect wake up.

Tap your "Away" scenario when you leave the house and be sure all your electronics are turned off and your security system is armed.

The all-in-one solution VMax by Vitrea integrates seamlessly with third-party systems.

Thus, in addition to connecting with lights, thermostats and blinds, you can also connect audio and video systems, home security systems and more ....

When you're ready to relax after a long day, activate your party scene with a single button and in a split

second, the lights will turn off, and your TV or audio will turn on.

Use the app to turn on the lights and activate your home security system, even on vacation halfway around the world. The possibilities are endless when you have a fully connected home.

A Modern  
Style of Living.  
A State-of-the-Art  
Solution.

# High-Tech Digital Construction

Increase the value and appeal of the homes you build by including the VMax by Vitrea all-in-one solution.

This simple and economical solution is easy to install and simple to configure, making it ideal for apartment buildings or offices.

Our innovative VMax Master Controller is specifically designed to handle many functions without the need to add additional components, allowing you to reduce costs without sacrificing functionality.

With a wired unit added to the electrical panel, you can control the common of a residence.

Residents will be impressed by the system's premium keypads and Vitrea's easy-to-use app for iOS and Android. Customers who want complete home automation can easily and inexpensively migrate to Vitrea's VTouch Pro, and no additional infrastructure or construction is needed because the Pro system runs wirelessly with Vitrea's ARANET technology.

# The Smartest Business Plan

For business or leisure companies,

VMax All-in-One will transform the atmosphere of your business according to the time of day, the weather conditions or a predefined schedule of your choice.

With only the need to install a controller, this cost effective solution offers you many unique options and benefits.

You'll have total control over the lights, temperature, shades and more inside your restaurant, spa or store, or in the comfort of your sofa, eliminating the need to remind you to turn off lights or turn on the music.

Automate the environment of your business by setting up scenarios such as dimming lights at sunset for a romantic atmosphere or by adjusting the temperature inside depending on the outside temperature.

Saving expensive energy and creating the right atmosphere has never been so easy or so beautiful.

Make a lasting impression.

VMax connects to your hotel's management system, allowing your reception team to turn on the lights in the room, or the suite for a warm welcome, and also turn off electronics from the front desk to save money. 'energies.

Elegant and elegant glass keyboards are engraved to allow your guests to effortlessly trigger predefined scenarios such as "All Lights On" or "TV Time" and they can even signal to reception if the room is occupied or if it can be cleaned via the MUR / DND keypads.

For a complete design look that will leave a lasting impression of luxury and convenience on every customer, install coordinated glass lighting keyboards, thermostat keypads, MUR / DND keypads and power outlets that match the décor of each room. .
